

Introduction to Quantitative Political Analysis

or how I learned to stop worrying and love the stats

PSC 693—Fall 2022

Department of Political Science

Syracuse University

Professor: Seth Jolly

Contact Information

Office: 325 Eggers Hall

Phone: (315) 443-8678

Email: skjolly@syr.edu

Office Hours:

Tuesday 3:30–4:30pm or by appointment

Student Drop-In Hours:

Thursday 11am–12pm in Eggers Cafe

Seminar: Tuesday 12:30–2:30pm in Eggers 100

Stata Lab: Friday 10:35–11:30am in Life Sciences 215

Course Overview

This course introduces students to the basic statistical methods used in the study of political science. In the seminars and labs, you will learn to describe and analyze social science data, such as national election surveys. Throughout the course, you will also learn to understand the importance of randomness in statistical research, conduct statistical tests, present your results, and evaluate the implications of quantitative analysis. You will learn to compute most of the techniques both ‘by hand’ and with *R*, statistical software commonly used in political science and industry.¹

Contemporary political science research in all subfields utilizes statistical techniques and, consequently, a basic understanding of these methods is crucial. The goal of this course is to provide students with the statistical tools necessary to become a sophisticated consumer and producer of quantitative research.

Course Expectations and Requirements

Homework

Homework will be assigned at least three times during the semester, with each assignment worth 100 points. You will have one week to complete the assignments. Late assignments will receive a penalty of 10 points per day. You may work in groups when completing your assignments, but the finished assignments must reflect your own, individual interpretations of the results. You will also have occasional *R* lab assignments.

Exams

The mid-term and final exam will be take-home exams based on the material covered in class and the readings. The final exam will not be cumulative, although the second half of class clearly builds on the first half. These exams will be similar to the homeworks except that you are expected to work alone, *with* the aid of your notes and texts.

¹If you are interested in learning *Stata*, we can discuss tutorials and options for that software as well.

Project

In the research project, you will develop an interesting, testable hypothesis. You will need to obtain an appropriate data set and analyze this hypothesis using the statistical tools from class. You will not necessarily need to conduct extensive outside research or elaborate a full literature review. The focus of the paper should be describing and analyzing the data. The finished product should be no more than 10 – 15 pages but it can be part of a bigger project (e.g., for another class). We will have time to work on the projects in lab. I will hand out further instructions in class.

Participation

As a graduate seminar, each participant will be expected to attend class and be prepared to discuss the assigned readings. Active student participation is essential to a successful seminar.

Learning Outcomes

This course has three main goals:

- To help you understand the uses and importance of statistical methods in political science.
- To help you develop skills to analyze social science data using basic statistical methods.
- To help you improve the writing and presentation skills associated with quantitative methods.

Evaluation

Homeworks	25%	Mid-term Exam	25%
Final Exam	25%	Project	25%

Required Readings

Required books available at the SU bookstore. Other readings available in Blackboard.

Agresti, Alan. 2017. *Statistical Methods for the Social Sciences*. 5th ed. Pearson. [This book is also available as an ebook from [coursesmart.com](https://www.coursesmart.com) or [amazon.com](https://www.amazon.com), either as a rental or purchase.]

Strausz, Michael. 2022. *Are you ready for R? A Workbook for R for Political Science and Beyond*. Spring 2022 edition. Available at: <https://www.michaelstrausz.com/r-workbook> [Blackboard]²

Supplementary Books

These books offer different approaches, with varying degrees of sophistication. These books are not required, but if you want to learn more about a specific topic, these are good resources.³

Achen, Christopher. 1977. *Interpreting and Using Regression*. Beverley Hills, CA: Sage.

Griffiths, William E., R. Carter Hill, and George G. Judge. 1993. *Learning and Practicing Econometrics*. NY: Wiley & Sons Publishers.

Imai, Kosuke. 2017. *Quantitative Social Science. An Introduction*. Princeton University Press.

Healy, Kieran. 2019. *Data Visualization: A Practical Introduction*. Princeton University Press.

Pollock III, Philip H. and Barry Clayton Edwards. 2017. *An R Companion to Political Analysis*. 2nd Edition. Washington D.C.: CQ Press.⁴

Statistical software

In this course, we will be learning and using *R* in the **RStudio** app. **RStudio** is a free app available at rstudio.com and it is also available in ITS supported computer labs, such as Life Science 215.

²We will also be making use of other online R tutorials at times to supplement the book especially with ggplot and tidyverse, including *R for Data Science* at <https://r4ds.had.co.nz>.

³Increasingly, there are open-source and free textbook options, including <http://www.openintro.org>. This website offers video lectures too, in case you are interested in another view on a topic.

⁴This book is particularly helpful with weighted data but primarily uses packages created for the book (so not base *R* or tidyverse).

Seminar Schedule

Seminar 1. Introductions and Overview (Tuesday, 30 August)

Achen, Christopher. 2002. “Advice for Students Taking a First Political Science Graduate Course in Statistical Methods.” *The Political Methodologist* 10.2 (Spring): 10–12.

King, Gary. 2020. “So You’re a Grad Student Now? Maybe You Should Do This.” *Sage Handbook of Research Methods in Political Science*, eds. Robert J. Franzese, Jr. and Luigi Curini. Sage Publications.

Lab 1. Hello *R* (Friday, 2 September)

Strausz Ch. 1 “Getting Started with R” and Ch. 2 “Welcome to the tidyverse.”

*** *If you are using your own laptop for **R**, you should download **R** and **R Studio** before class. If you have any issues, feel free to come to lab early to discuss.*

Seminar 2. Statistical Methodology, Sampling and Measurement (Tuesday, 6 September)

Agresti Chs. 1–2

Lab 2. Descriptive Statistics (Friday, 9 September)

Strausz Ch. 3 “Graphing and describing variables.”

Seminar 3. Descriptive Statistics (Tuesday, 13 September)

Agresti Ch. 3

Kellstedt, Paul and Guy D. Whitten. 2019. Ch. 3 “Evaluating Causal Relationships.” *The Fundamentals of Political Science Research*. Cambridge University Press. [Blackboard]

No Lab due to APSA (Friday, 16 September)

Seminar 4. Probability Distributions (Tuesday, 20 September)

Agresti Ch. 4

Bakker, Ryan, Seth Jolly, and Jonathan Polk. 2020. “Multidimensional Incongruence, Political Disaffection, and Support for Anti-Establishment Parties.” *Journal of European Public Policy*.

Homework 1 passed out in Seminar 4.

Lab 3. Transforming Variables (Friday, 23 September)

Strausz Ch. 4 “Recoding and comparing values of variables.”

Supplementary: Strausz Ch. 10 “R in the Wild.”

Seminar 5. Statistical Inference: Estimation (Tuesday, 27 September)

Agresti Ch. 5

Kim, Minju and Shu Fu. 2022. “Ambassadorial Bacon: The Home-State Effect of US Ambassadors on Trade.” *working paper*.

Homework 1 due in Seminar 5.

Lab 4. Making Comparisons and ggplot (Friday, 30 September)

Strausz Ch. 5 “Making controlled comparisons.”

Supplementary: Wickham, Hadley, Danielle Navarro, and Thomas Lin Pedersen. 2020. Ch. 1 “Introduction.” *ggplot2: Elegant Graphics for Data Analysis*. <https://ggplot2-book.org/introduction.html>

Seminar 6. Statistical Inference: Significance Tests (Tuesday, 4 October)

Agresti Ch. 6

Research topic paragraphs due in Seminar 6.

Homework 2 passed out in Seminar 6.

Lab 5. Inferences about Sample Means (Friday, 7 October)

Strausz Ch. 6 “Making inferences from sample means.”

Seminar 7. Review and Mid-Term (Tuesday, 11 October)

Cleary, Matthew. 2007. “Electoral Competition, Participation, and Government Responsiveness in Mexico.” *American Journal of Political Science* 51.2 (April): 283–299.

Homework 2 due in Seminar 7.

Take-home mid-term passed out in Seminar 7. Exam due Friday, 10/14.

Lab 6. More Tables and Graphs (Friday, 14 October)

Healy, Kieran. 2019. Ch. 5 “Graph Tables, Add Labels, Make Notes” *Data Visualization: A Practical Introduction*. Princeton University Press. [Blackboard]

Supplementary: Kastellec, Jonathan and Eduardo L. Leoni. 2007. “Using Graphs Instead of Tables in Political Science.” *Perspectives on Politics* 5.4 (December): 755–771.

Seminar 8. Comparison of Two Groups (Tuesday, 18 October)

Agresti Ch. 7

No Lab (Friday, 21 October)

Dataset selection for paper submitted via email by 21 October.

Seminar 9. Analyzing Associations (Tuesday, 25 October)

Agresti Ch. 8

Lab 7. Measures of Association (Friday, 28 October)

Strausz Ch. 7 “From chi-squared to Somers’ D.”

Seminar 10. Linear Regression & Correlation (Tuesday, 1 November)

Agresti Ch. 9

Bartels, Larry M. 1990. “Five Approaches to Model Specification.” *Political Methodologist* 3.2: 2–6.

Lab 8. Correlation and Regression (Friday, 4 November)

Strausz Ch. 8 “Pearson’s r and linear regression.”

Seminar 11. Multiple Regression & Correlation (Tuesday, 8 November)

Agresti Ch. 10–11 (skim pages 331–337)

Supplementary: Brambor, Thomas, William Roberts Clark and Matt Golder. 2006. “Understanding Interaction Models: Improving Empirical Analyses.” *Political Analysis* 14.1: 63–82.

Final project outline due in Seminar 11, including dataset choice.

Homework 3 passed out in Seminar 11.

Lab 9. Multiple Regression (Friday, 11 November)

Strausz Ch. 9 “Multiple regression.”

Seminar 12. Multiple Regression & Correlation (cont’d) (Tuesday, 15 November)

Agresti Ch. 13–14

Homework 3 due in Seminar 12.

Lab 10. Graphing Models & Presenting Results (Friday, 18 November)

Supplementary: Healy, Kieran. 2019. Ch. 6 “Work with Models.” *Data Visualization: A Practical Introduction*. Princeton University Press. [Blackboard]

Everyone should resolve dataset issues by this week.

Thanksgiving Break Week of November 21st

Seminar 13. Logistic Regression (Tuesday, 29 November)

Agresti Chs. 15 and 16 (skim pages 480–484)

Lab 11. Logistic Regression (Friday, 2 December)

Seminar 14. Review (Tuesday, 6 December)

Final Exam passed out in Seminar 14. Final Exam due Friday, 9 December.

Lab 12. Regression Diagnostics (Friday, 9 December)

Final Project due at 12:00pm on 16 December via turnitin.

University Policies

Academic Integrity

The Syracuse University Academic Integrity Policy holds students accountable for the integrity of the work they submit. Students should be familiar with the Policy and know that it is their responsibility to learn about instructor and general academic expectations with regard to proper citation of sources in written work. The policy also governs the integrity of work submitted in exams and assignments as well as the veracity of signatures on attendance sheets and other verifications of participation in class activities. Serious sanctions can result from academic dishonesty of any sort. For more information and the complete policy, see <https://class.syr.edu/academic-integrity/>.

Academic dishonesty will not be tolerated. If I suspect academic dishonesty or plagiarism, I will submit formal reports to the Dean of the College of Arts and Sciences. Also, <http://www.plagiarism.org> is a useful website for tips on citations and other writing resources.

Statement Regarding Disability-Related Accommodations

Syracuse University values diversity and inclusion; we are committed to a climate of mutual respect and full participation. There may be aspects of the instruction or design of this course that result in barriers to your inclusion and full participation in this course. I invite any student to contact me to discuss strategies and/or accommodations (academic adjustments) that may be essential to your success and to collaborate with the Center for Disability Resources (CDR) in this process.

If you would like to discuss disability-accommodations or register with CDR, please visit Center for Disability Resources. Please call (315) 443-4498 or email disabilityresources@syr.edu for more detailed information.

The CDR is responsible for coordinating disability-related academic accommodations and will work with the student to develop an access plan. Since academic accommodations may require early planning and generally are not provided retroactively, please contact CDR as soon as possible to begin this process.

Religious Observances Policy

SU's [religious observances policy](#) recognizes the diversity of faiths represented in the campus community and protects the rights of students, faculty, and staff to observe religious holy days according to their traditions. Under the policy, students are given an opportunity to make up any examination, study, or work requirements that may be missed due to a religious observance, provided they notify their instructors no later than the academic drop deadline. For observances occurring before the drop deadline, notification is required at least two academic days in advance. Students may enter their observances in MySlice under

My Slice/StudentServices/Enrollment/MyReligiousObservances/Add a Notification.

Campus Resources

There may be times during the semester that you need assistance, academically or otherwise. There are a wide variety of campus resources that may be able to help. Please consider using help when you need it. If you don't know what type of help you need, you can ask me or other faculty.
